

They say that justice is blind. But all around the earth, in country after country the "Letter of the Law" is murdering the "Spirit of the Law". Sadly, "motive" is no longer a calculation in determining Justice.

In almost every nation on earth the intentions of the morally upright are no longer considered. Crossing the T's and dotting the I's has replaced "weight of calculus" in justice.

All over the world "hired" legal sophists and spin doctors have destroyed the foundation of a once proud and vibrant democracy. Justice has become monetized. Victory goes to those with the deepest pockets. These legal charlatans and manipulators of the public relations; who believe in victory by any means necessary; have destroyed all the earth's system of government. Once democracy was the shining star on the hill in ancient Egyptian, China and Greece. But, those who seek to enslave mankind to their will have won.

The ruins of democracy are spread evenly around the earth. Those of lower spiritual evolution seek no compromise. No consensus. They seek no cooperation. They are not interested in freedom for all; only freedom for them. And for now they have seized control of their governments. They have no interest in sharing the resources of our earth which is the only way to bring about peace and justice. And those who hunger and are homeless see no hope in these failed "democracies". They desperately cling to the breadcrumbs of survival sanctimoniously dispensed from the hands of the selfish fascist. Make no mistake. A house divided can not stand. Sooner or later these opposing forces will come into open armed conflict. If not by global warming then by force of arms. It is my hope that you consider this matter very carefully. Somehow, somehow these opposing groups must be taught that their survival is co-dependent.
